

# Peter SABADAC

REMOTE ANDROID CONSULTANT/BLOCKCHAIN DEVELOPER

## Profile

Remote Android Consultant with interest in Blockchain and Cyber Security.

## Employment History

### Android Engineer, BMW, München, Germany

MAY 2022 – JANUARY 2023

- Worked on the Voice Assistant app.
- Tested & Develop on the Test Rack & Emulator.
- Did weekly releases.
- Prepared and hold grooming sessions.

### Android Engineer, OneView Healthcare, Iași, România

JANUARY 2022 – MAY 2022

Android Development for custom medical hardware devices from different hardware manufacturers like Wetek, Samsung, Elo:

- Interact with client hardware and manufacturer's SDKs.
- Develop features/fix bugs/create unit tests for healthcare applications.
- Azure Devops for git version control.
- Koin/Dagger2 for dependency injection.
- Coroutines for asynchronous programming.
- Kotlin flows for reactive programming
- Retrofit for network operations

### Android Developer, Bitdefender, Iași, România

MARCH 2018 – OCTOBER 2021

Worked on an app used to control security for all protected devices.

- Started by doing massive refactoring (from Java to Kotlin) on a module used to manage configuration and firmware updates of IoT Security Solutions
- Used Kotlin with Coroutines and Android Architecture Components like ViewModel, LiveData and Data Binding
- Implemented multiple complex animations and layouts
- Built from scratch a network scanner used to detect nearby devices

#### Bitdefender Central

Single-handedly build a VPN app and a design SDK.

- Used Android Navigation Library with Kotlin and Shared View Model
- Implemented multiple complex animations using Lottie
- Integrated Google Billing and in-app purchases

#### Bitdefender VPN

### Software Designer, CRF Health, Iași, România
